

How to use our Logos

This is FXStreet's Official Logo:

FXSTREET

There is an alternate version of it for use only with white or transparent backgrounds:

FXSTREET

Its Minimum Display Size is:

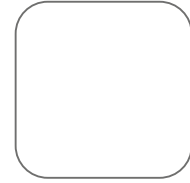

These are the Primary Colors of the Logo:

#0F3A5A

#FA9900

#FFFFFF

If the logo is displayed in a very narrow space, compromising legibility, an *Acronym version* can be used instead:

35px minimum

In case you are printing a document in black and white, and want to include the FXStreet logo, you can, only in this context, use the *b/w* version:

FXSTREET

If the logo is displayed on screen or printed with a desktop printer, download it in *.png* format.

If the logo is used in professional printing, such as magazines or flyers, download it in *.eps* or *.pdf* format.

Incorrect Uses of our Logo:

Wrong Colors

Don't use white or light color background with the transparent logo

Don't alter or distort the proportions of the logo

Don't Pixelate the Logo
